

SWAMPS, RIVERS & RANGES INC

Bird Monitoring in 2022

FEB

SUMMER SURVEYS

Throughout February (preferably the first 2 weeks) is the best time to get out and conduct the summer surveys.

APR

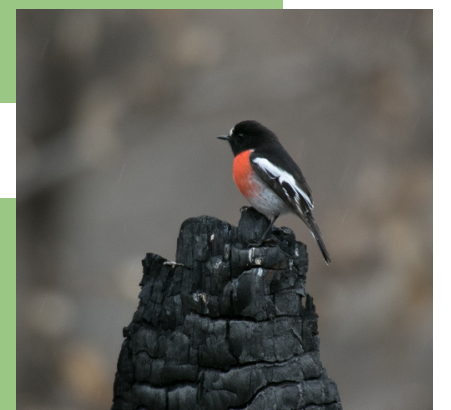

AUTUMN SURVEYS

Throughout April is the best time to get out and conduct the Autumn surveys.

JUL

WINTER SURVEYS

Throughout July is the best time to get out and conduct the Winter surveys.

NOV

SPRING SURVEYS

Throughout November (preferably the first 2 weeks) is the best time to get out and conduct the spring surveys.

All timing for surveys is approximate, if the chosen dates don't suit a week either way is ok, we understand many influences such as weather can disrupt surveys.

SRR value the ongoing efforts of volunteers and their dedication to conducting seasonal surveys which contribute to ongoing data for research. We appreciate surveys being sent through when complete to swampsriversranges@gmail.com

SRR offer a number of extra opportunities to conduct bird surveys throughout the year particularly around November.

If you are interesting in getting involved in these additional opportunities or in the SRR bird monitoring program please email us at swampsriversranges@gmail.com

We have a number of resources such as survey sheets and this document which can be provided via electronic link via the above email.
